All

See the message from EPA below. This stems from a meeting I had with EPA last week where I provided Kevin and Sally the names, phone number and emails for the CMT members and told them that you would be coordinating your bureaus involvement in the RI/FS process and as such any bureau comments should come from or through you. If you or your staff had comments please confirm with me, **by next week**, that they were indeed coordinated through you. While not everything has to be a coordinated DOI response, future correspondence, directly between you and EPA, on technical matters should either come from you or through you in order to ensure that EPA is receiving the formal bureau comments. This will prevent confusion and miscommunication with EPA in the future. Thanks for your attention to this matter.

Preston

Dear Mr. Sleeper,

At the end of October, I sent you a document showing locations that EPA proposed for sediment sampling during the RI/FS. I requested that you provide us with information on additional areas that DOI would be interested in having sampling during this event. Our contractor CH2M Hill received information from NPS, however, I am not sure whether this submittal is the coordinated DOI position.

I would appreciate your help in coordinating the DOI response to my previous request, or your confirmation that what we received is in

fact DOI??TM's request.

I would appreciate your response within a week of your receipt of this letter. Thanks you for your help on this matter.

Sincerely,

Kevin Rochlin
Project Manager
